Safari Flash Fix for Mac OSX 10.7-10.10

These instructions will fix the Flash security issues that prevents users from viewing videos properly for some Robotics Academy curriculum products.

Manually set the website preferences

Safari’s security settings for Flash must be set to allow the curriculum to run.

1. Choose Safari > Preferences...

2. Click the Security pane.

3. Click Manage Website Settings... to see plug-in details.
4. Select Adobe Flash Player on the left.
5. Next to Local Documents, select Run in Unsafe Mode.
6. Click **Trust** when prompted.

7. Press **Done** in the **Preferences...** window.
8. Close Safari and re-open it.

You should now be able to view the videos in the lesson.

If you have any questions or issues please email customerservice@robomatter.com.
