Patterns of Behavior Quiz

NAME ___________________________________________ DATE ________________

1. In your own words, define a behavior.

2. Which of the following keywords begins a function declaration?
   a. task
   b. int
   c. main
   d. func

3. Use the following code to answer the questions below.

   ```c
   void specialFunction(int p)
   {
     motor[motorC] = p/2;
     motor[motorB] = p/2;
     wait1Msec(100*p);
   }

   task main()
   {
     specialFunction(50);
   }
   ```

   a. What behavior would running this program cause your robot to exhibit?

   a. How could you get specialFunction to move for 1 second?
